

**2009 – 2012 Work Programme  
Luxembourg, September 4th 2012**

---

## **Energy & Tourism perspectives**

1. Perspectives in Energy
2. Perspectives in Tourism
3. Common perspectives

- Continuing regional energy outlook
- Strengthening the network for permanent monitoring of efficiency indicators (bottom up)
- Supplementing research with a territorial and operational approach
- Proposing and testing new business models
- Continuing and extending regional cooperation on energy
- Others:
  - Electricity sector in the SEMCs
  - Regional assessment of renewable marine energy and biomass potential
  - Climate change
  - Economic and social aspect

## For pilot destinations:

- Design of a charter for sustainable tourism in Mediterranean to provide a general framework for local specifications
- Creation of local governance fora
- Establishment of local tourism sustainability observatories

Territorialising  
the tourism  
industry:  
redefining  
sector  
governance at a  
local level

A common need  
for a bottom-up  
approach and  
scenarios

- Share and validate assessments of the state of sustainability of tourist destinations
- Collectively map out their potential futures and develop an action plan
- Promote use of an observatory for decision-making
- Improve knowledge through a bottom-up approach
- Develop scenarios and produce simulations
