The story of SoED

Human activities and behaviour are the main drivers of environmental change in the world and in the Mediterranean. These activities exert increasing pressures on ecosystems leading to degradation of environment and livelihoods. A further exacerbation of already existing fragilities of the Mediterranean eco-socio-system is projected.

How?

- Upscale action to protect & restore
- Enforce regulations
- Invest in transitions
- Monitor & put knowledge to use
- Work together

The Mediterranean environment can be safeguarded

- while simultaneously fostering human development
- taking into account South-East-North differences

Through urgent and collective efforts for transformative change

- A fundamental and systemic reorganization of economic and social (incl. legal) systems
- Including profound changes in paradigms and values
- Required to achieve SDG’s in the region
